

**Electromagnetically-isolated  
Electric Field Sources:**

- Spherical Dipole Antennas
- Comb Generators
- Quasi-Peak Detector Stimulators

1437 H.G. Trueman Rd  
Solomons, Maryland 20688  
410-326-6728

An Inter-Laboratory  
Transfer Standard!

Ultra-Repeatable, Precision  
Spherical Dipole Source!

10 MHz – 15 GHz Highly Stable,  
Comb Generators!

Spherical Radiators!  
Bench Top Units!  
USB Port Powered!

**Selectable Fundamental Frequencies and Optional QPD Stimulator!  
Rechargeable Batteries Provide Operating Times of up to 8+ Hours!**

Unique test equipment products for highly  
accurate and repeatable RF measurements:

- EMI/EMC and RF Laboratories
- Antenna Calibration
- Shielding Effectiveness

*Advanced technology for accurate electromagnetic measurements!*
